

Gynaecological oncologists work with a [multidisciplinary team](#) that also includes medical oncologists, radiation oncologists, genetics specialists, highly experienced nurses, psychologists, and other allied health staff, all with experience in providing the best evidence-based care for women diagnosed with a gynaecological cancer. This ensures that all women with gynaecological cancer receive the best standard of care, and the best possible survival outcome.

Dr Farrell has been a gynaecological oncologist for over 10 years and works closely with a multidisciplinary gynaecological cancer team to ensure that you receive the highest standard of care.

The benefits of adopting a multidisciplinary team (MDT) approach include:

For patients:

- Increased survival for patients managed by a MDT team
- Shorter timeframes from diagnosis to treatment
- Greater likelihood of receiving care in accord with clinical practice guidelines, including psychosocial support
- Increased access to information
- Improved satisfaction with treatment and care.

For health professionals:

- Improved patient care and outcomes through the development of an agreed treatment plan
- Streamlined treatment pathways and reduction in duplication of services
- Improved coordination of care
- Educational opportunities for health professionals
- Improved mental well-being of health professionals
